

ERASMUS PROJECT

STEM 4 WATER

Krystian and Ricard, Ahmet and Marc, Kamila and Abril

WHAT ARE WE DOING?

WATER LEVELS

We are doing another presentation about the water level in Spain, Poland and Turkey.

SOLUTIONS

We are thinking what citizens can do to reduce the use of water in the different countries.

PLANTS PROJECT

Our institute wants to do an experiment.
Try planting two plants, watering one with a watering can and feeding the other with rainwater.
The goal is to see which grows more and faster.

WATER PROJECT

01

SEARCH INFORMATION

We searched information about the water levels of Spain, Poland and Turkey.

02

PRESENTATION

We create a Presentation and starting to out the information we got.

03

SOLUTIONS

After searching the water levels, we started to think about posible solutions to reduce the use of water.

04

ORGANIZATION

Finally, when we got all the information, we distributed the different ideas in several slides.

PLANTS PROJECT

My high school want to put this “Bed of vegetables”.

WHY?

It is an experiment to find out which plant grows more depending on the level of water it is given.

EXPECTATION

We think that the result of this experiment will be that the watered plant will grow more than the plant fed by rainwater.

THANK YOU!
